

ROTARY MAGNETIC GRID

- Sealed stainless steel structure, unique, optimized magnetic circuit design to form a high gradient field strength, large pull, sorting effect is good

- Surface treatment: mirror polishing, drawing and polishing, sandblasting

- Cleaning methods: conventional type, casing easy to clean type

Products description:

The treated materials are designed to be free from iron contamination, it is widely used in industries that require product quality. It can be designed according to customer requirements into different sizes and grate magnets' layers.

Model	Dimension(mm)				Motor power	No. of rods	Weight(Kg)
	Inlet Diameter	W	L	H	KW		
RGMS-150	150	205	208	450	0.25	7	30
RGMS-200	200	255	258	500	0.25	9	45
RGMS-250	250	305	308	550	0.25	11	60
RGMS-300	300	355	358	600	0.37	13	80
RGMS-350	350	405	408	650	0.37	15	100
