

# MAGNET BAR

## Product introduction:

Grate magnets used for Removing iron contamination from dry free-flowing grain, flour, sugar, powders, pigments, chemicals as well as plastic and other products. Grate magnets are typically installed in hoppers or bins and can be rectangular, square or round. With strengths as high as 1.2 Tesla (12,000 Gauss) our Econo-Grate magnet range offers high quality at fair price and extends from single-row to multi-row, housed and drawer type as well as easy-clean and self-cleaning styles.
