

MAGNETIC BOX

Product description:

Keep Cutting Coolants Clean with Self-Cleaning Magnetic Chip Coolant Separators while Reducing Costs. Remove ferrous and non-ferrous particles easily and efficiently. The coolant is directed into a powerful wet industrial magnetic drum separator, which attracts the ferrous particles onto the drum magnet face, the resulting cake also traps the non-ferrous contaminants when operating in index mode.

Self cleaning magnet

Permanent Magnet Hi-intensity flat faced exposed polarity drum, provides most effective separation.

No paper products or filter elements to buy or dispose of, eliminating media costs

Magnetic filter cleans coolant, providing longer life and lower costs

Extends life of tooling and machinery

Stainless steel housing

Standard unit operates in continuous mode
